Welcome to Harvard Analytics and Reporting Tool (HART)

Welcome to Harvard Analytics and Reporting Tool (HART), powered by OAS (Oracle Analytics Server). HART is Harvard’s reporting and analytics system for administrative data, including Finance, Research Administration and Library.

Planned Outages, Monthly Releases and Notes

HART Dashboard enhancements are released monthly. These releases usually require a planned outage of the system. For more information about upcoming planned outages, dashboard enhancements, and the full Release Notes, visit the 3-Month Release Plan on the HART Wiki Site.

System Availability

HART business hours run from 7 am-8 pm daily. Please note the following:

- While HART is available after 8 pm, it is highly recommended that users do not access dashboards after this time. After 8 pm, data loads are being run to update the data from the previous business day. Thus, running most dashboards after 8 pm will deliver inconsistent results.
- While HART is available on Saturday and Sunday, the data will be accurate as of the end of business on the previous Friday.

GMAS Updates

Updated current/pending download in GMAS:

• Every investigator in GMAS has a “current/pending support” Excel download available from their person profile page

• This download contains details from all active and pending projects, meant to aid in completing a sponsor’s “current and pending” or “other support”

New changes—available now:

• The file now includes a two-year view of committed and pending effort over time

In the works:

We are working as part of the Faculty Disclosure Work Group on upcoming changes to support the new federal guidance and requirements
GMAS Roadmap Updates

• The next GMAS release is planned for May 10, 2021
  – This will be a mostly technical release with some important infrastructure upgrades
  – Minor enhancements and bug fixes will also be included, more details will be available soon

• Next major business priorities:
  – New request type to facilitate changes to committed effort and the research team (planned for late summer/early fall)
  – Improvements to the workflow for subagreements (planned for fall/winter)
